Authentication:

User name:

Password:

Proxy server

☐ Address: Port:

☐ Requires manual reset to return to Ok status.

FIGURE 6

The image shows a Windows-style dialog box titled "WMI Instance Properties". It has a standard title bar with a question mark icon and a close button (X). Below the title bar is a tabbed interface with four tabs: "General", "Details", "Actions", and "Message". The "General" tab is currently selected. Inside the "General" tab, there is a text area with the instruction: "Specify the Windows Management Instrumentation (WMI) class or instance to monitor. Choose one instance or leave the instance field blank to track all instances." Below this text area are four labeled fields: "Namespace:", "Class:", "Instance:", and "Properties:". The "Namespace:" field contains the text "ROOT\CIMV2" and has a "Browse..." button to its right. The "Class:" field contains the text "MicrosoftHM_IcmpPing" and has a "Browse..." button to its right. The "Instance:" field contains the text "Address=''", Timeout=1000" and has a "Browse..." button to its right. The "Properties:" field contains a list of checkboxes: "Status Code", "Status Description" (which is checked), "Address", "Timeout", and "Response Time". At the bottom of the dialog box, there is a checkbox labeled "Requires manual reset to return to Ok status." and a set of four buttons: "OK", "Cancel", "Apply", and "Help".
